

### **RISK ASSESSMENTS:**

You will need to update your RA's to include management of the risks presented by CoVid19. There is some excellent advice available from:

[www.hsa.ie](http://www.hsa.ie), including:

[Return to Work Safely Protocol](#)

[COVID-19 public health information and guidance.](#)

[Return to Work Safely Templates, Checklists and Posters](#) (remember your students need return to class safety checklists too)

[HSA Return to Work Safely Online Courses](#)

Some of these are aimed more at industry, but can be adapted to include guidance from the Department of Education.

Here is a FREE ***Co-Vid19 risk management course*** that you may like to include with your policies and procedures. You will receive a certificate on completion. Any staff you may employ will also require training and certification.
